

The Health Australia Party (HAP) is a true centre party committed to promoting open and transparent Government decision making, balance and honesty of information, and stimulating individual freedom of choice and thought - to ensure we have a genuinely Healthy Australia.

We believe a Healthy Australia is built on the following five fundamentals:

**Healthy People**

**Healthy Economy**

**Healthy Environment**

**Healthy Democracy**

**Healthy Society**

One of our five key pillars is:

# Healthy People

We believe in:

- **The need build a health-creation system,** in place of the our current disease-management system
- **Addressing alarming rates of chronic disease** by changing the current medical business model to ensure that drug manufacturers have incentives to promote good health
- **Quality, affordable medicine for all people,** with access to the best of proven natural and pharmaceutical medicine, as demonstrated using unbiased, real world clinical studies
- **Promoting the establishment of Integrative Medical Centres** where patients can access the best of conventional and natural medicine, and where practitioners from all disciplines work cooperatively together
- **The need to ensure research funds are applied wisely,** and researchers are chosen for their skill as well as their genuine independence from vested interests.

**Health Australia Party**  
...a healthy choice
